# Electric vehicle infrastructure

Electric vehicle infrastructure are a rapidly growing market, and with the number of electric vehicles on Danish roads, the need for charging points is growing. At Intego, we offer our expertise in the installation of charging points and charging stations – on commercial and private property, as well as in public places.

With us, you get a partner with years of experience in the entire installation process, from project planning to commissioning. And we naturally advise you on placement and help you to define your current needs.

### Turnkey solutions

Our installation expertise is nationwide, and with branches across the country, we are there for you in no time when you need it most. We advise, plan, install, test and commission charging points and stations for private and commercial use. Because we have been here from the very beginning, ever since electric vehicles first appeared on Danish roads, you get a partner with solid and broad experience.

### Tesla and E.ON partner

Since 2010, we have installed, tested and commissioned more than 2000 charging points across the country. That is your guarantee for a professional solution that lives up to manufacturer requirements thanks to our effective and well-tested working concept. We have installed charging points for, e.g. E.ON – previously BetterPlace, and as a Tesla partner, we are a turnkey supplier for Tesla's Supercharger stations across Denmark. The Supercharger stations have the capacity to supercharge 8-12 Tesla vehicles simultaneously and use, among other things, solar cell technology.

### Service when you need it

We offer service on charging points and stations across the country, and as an Intego customer, you have access to our 24-hour service, 365 days a year. In other words, we are there to assist you when and where the need arises. If you choose us to establish one or more charging points or stations, we naturally provide mandatory annual service inspection. That way you can rest assured that the installations live up to current legislation at all times.
